(Significant changes from previous situation reports are in red.)

Significant Issues:

River Watch 2022

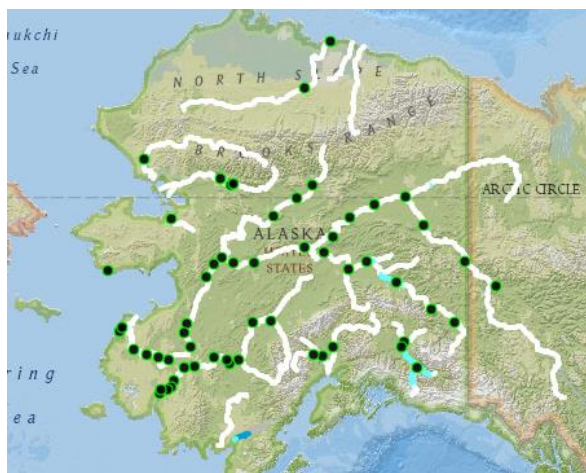

The SEOC has started preparations for the 2022 River Watch program.

River Watch is a cooperative inter-agency partnership between the National Weather Service (NWS) and the State Emergency Operations Center (SEOC), using aerial surveillance, to observe ice conditions and provide real-time spring break-up flood threat information to local communities.

The SEOC initiated weekly National Weather Service (NWS) and SEOC inter-agency conference calls with communities on the Kuskokwim and Yukon Rivers last week, as well as coordination calls with regional tribal organizations and volunteer agencies.

The SEOC intends to deploy the Kuskokwim Division Supervisor to Bethel on Wednesday, April 27 and initiate daily River Watch flights on Friday, April 29 and the SEOC Incident Command organization will begin the incident action planning process for River Watch this week and intends to produce a bi-weekly incident specific River Watch Situation Report on Tuesday and Thursday.

NWS break-up map and current river conditions can be found at: www.weather.gov/aprfc

River Status

- Unknown
- Mostly Ice
- Some Open
- Mostly Open
- Open
- Flood Advisory
- Flood Watch
- Flood Warning

Threat Level Changes:

None.

State of Alaska Department of Health and Social Services (DHSS)
