(Significant changes from previous situation reports are in red.)

**Significant Issues:**

**Major Coastal Sea Storm:**

This morning, Gov. Dunleavy issued a verbal declaration of disaster for the communities impacted by the West Coast Storm.

The SEOC has moved to Preparedness Level 3 and will have staff in the SEOC over the weekend to continue supporting local communities in their response. There is potential for immediate emergency power and infrastructure missions, mass care missions, and deployment of OPS personnel.

As the storm moves off Alaska, SEOC will be contacting all 50 communities in the storm impact area to assess their status and damages and begin deploying disaster response resources as needed. The SEOC is receiving reports from multiple communities of power disruptions, damaged homes, shelters opened, flooding and infrastructure damage last night, and communities continued to report to SEOC throughout the night. There have been no reports of injuries at this time.

The SEOC has a FEMA hybrid Incident Management Assistance Team in the SEOC along with a US Coast Guard liaison and additional federal partners as needed as they continue to work with local and state government agencies, and private non-profit organizations to coordinate efforts to respond to this storm.

**Threat Level Changes:**

None.

**State of Alaska Department of Health (DOH)**

The DOH is leading the State of Alaska COVID-19 Recovery, supported by the SEOC and other state departments as required.
