(Significant changes from previous situation reports are in red.)

THREAT LEVEL CHANGES:

None

Significant Issues:

Tuluksak Water System Fire:

The SEOC will be deploying an Emergency Management Specialist to support the response and recovery efforts that are underway for the community.

Remote water maintenance workers, contractors, and the Yukon Kuskokwim Health Corporation have laid pipe to the Tuluksak River and expect to insert a pump. The team anticipates being able to pump water in and to have water for the school system this week. Next week they intend to begin thawing the water transmission line. Once operational, this temporary water system will provide non-potable water for a laundry facility, and hopefully the fire suppression systems for the school. SEOC is in regular contact with community leadership to address any immediate needs

Nuiqsut freezing issues

The Native Village of Nuiqsut contacted the SEOC yesterday afternoon requesting assistance with frozen homes and infrastructure. The SEOC contacted North Slope Borough (NSB) Emergency Management. NSB contacted the community and reported to the SEOC that there were no current issues that are beyond the capabilities of the Borough to assist. The SEOC contacted the DEC to see if they needed to address any drinking water issues, and also contacted the FEMA tribal liaison for situational awareness.

Selawik Power Outage:

AVEC continues to work on restoration of power to Selawik. Several regional organizations continue to assist the community. The SEOC will remain in contact with the community to identify any needs for assistance.

Coronavirus (COVID-19) Pandemic:

A unified command has been established at the SEOC. The SEOC continues to support statewide response to COVID-19.

State of Alaska Department of Health and Social Services (DHSS)

DHSS is operating as the Medical Branch under the State EOC/Unified Command.

For more information about the outbreak refer to:

<https://covid19.alaska.gov/>
