FOOD, WATER, AND EMERGENCY SUPPLIES

BOB CARMICHAEL

THE BIG PICTURE

- As you know:
 - Disasters happen
 - You **need** to have safe water
 - You **need** to have safe food
 - You **need** shelter and clothing
 - You **might need** medical supplies
 - It's not just you – Home, Work, Others, Pets

GET TO KNOW YOUR DISASTER

You may never know **when**, but you can get a good idea as to what.

Earthquake

Volcano

Flood

Fire

Tsunami

Power Outage

Civil Disturbance

Hazardous Materials

Wind

Supply Chain

TIME IS NOT YOUR FRIEND

- Time to prepare
- Time to protect
- Time to renew
- Time to use

At least 3 days

FOOD

الغذاء

Manje

Еда

Pagkain

Alimentation

식품

Alimentos

食料

食品

Thực phẩm

You don't need to buy dehydrated or special emergency foods
Look for items with a long storage life
Select items that require little or no cooking, water, or refrigeration
Try to avoid salty or spicy items
Plan for babies, those with special dietary needs, and pets
Check expiration dates

Ideal storage location is cool, dry, and dark
Avoid exposure to heat from the sun, stoves, and refrigerators
Store away from petroleum products. Some foods absorb their smell.
Protect supplies from rodents and insects

WATER

- One gallon per day per person / pet
- At least 3 days worth – 2 weeks is better
- Have unscented chlorine bleach available, replace every year, keep cool, 1 to 10
- Replace water every 6 months
- Use food-grade storage containers
- Containers should be air tight, can't break, never used for toxics, milk, fruit juices
- Store out of direct sunlight

Water

Drip

Drip
