THREAT LEVEL CHANGES: SEOC LEVEL 1 – ROUTINE OPERATIONS

Statewide Fires:

The SEOC has returned to Level 1 – Routine Operations, with the decline in fire resource requests and reduction in Alaska’s fire Planning level from **3 to 2**.

Significant Weather:

A strong storm, with accompanying near-record rainfall, impacted the west coast of Alaska over the weekend from the North Slope Borough to Norton Sound. SEOC was in contact with communities and regional tribal organizations in the area prior to the storm on Friday, and through the weekend as the storm hit. There are

preliminary reports of flooding in some locations. SEOC will be in contact with communities in the storm's path to evaluate the impacts. At the time of this report, there are no requests for State assistance.

High Water on Interior Rivers this week. Many Interior rivers north of Salcha to the Central Brooks Range are rising rapidly from the heavy rain that occurred through the weekend. Another round of heavy rain that is now over the Alaska Range is expected to spread north through early Tuesday. An additional 1 to 2 inches of rainfall is expected in the Alaska Range through Tuesday with a half inch to 1 inch for areas farther north. These high water levels have also issued a flood watch advisory north of the Alaska Range from Denali park to just north of Rainy Pass. The National Weather Service in Juneau has also issued a dense fog advisory in effect until 10:00am this morning for the southern inner channels including Ketchikan and Metlakatla.
