Significant Issues:

2023 Spring Flood Event:

SEOC moved to Preparedness Level 2 – Heighten Awareness – today as the 2023 Spring Floods incident has stabilized with ongoing mass care and recovery work that does not require the dynamic operational coordination of a full multiagency Command and General staff engagement and ongoing incident planning process. Ongoing operational coordination for this incident will be handled at a tactical level. After today operational briefings for this incident will be on an as needed basis and an Incident specific SITREP will no longer be published unless conditions change. Significant 2023 Spring Flood incident updates will be provided in this standard SEOC daily statewide SITREP.
