This newsletter discusses the preparation of the City of Golovin Hazard Mitigation Plan. It has been prepared to inform interested agencies, stakeholders, and the public about the project and to solicit comments. This newsletter can also be viewed on the State of Alaska Division of Homeland Security and Emergency Management Website at: http://www.ready.alaska.gov/plans/localhazmitplans.htm.

HMP Development

The City of Golovin was one of 21 communities selected by the State of Alaska, Division of Homeland Security and Emergency Management (DHS&EM) for a Hazard Mitigation Planning (HMP) development project. The plan identifies natural hazards that affect the community including earthquake, erosion, flood, ground failure, severe weather, and tundra/wildland fire. The HMP also identifies the people and facilities potentially at risk and potential actions to mitigate community hazards. The public participation and planning process is documented as part of the project.

What is Hazard Mitigation?

Across the United States, natural disasters have increasingly caused injury, death, property damage, and business and government service interruptions. The toll on individuals, families, and businesses can be very high. The time, money, and emotional effort required to respond to and recover from these disasters take public resources and attention away from other important programs and problems.

People and property throughout Alaska are at risk from a variety of hazards that have the potential for causing human injury, property damage, or environmental harm.

The purpose of hazard mitigation is to implement projects that reduce the risk severity of hazards on people and property. Mitigation programs may include short-term and long-term activities to reduce hazard impacts or exposure to hazards. Mitigation could include education, construction or planning projects. Hazard mitigation activity examples include relocating buildings, developing or strengthening building codes, and educating residents and building owners.

Why Do We Need A Hazard Mitigation Plan?

A community is only eligible to receive grant money for mitigation programs by preparing and adopting a hazard mitigation plan. Communities must have an approved mitigation plan to receive grant funding from the Federal Emergency Management Agency (FEMA) for eligible mitigation projects.

The Planning Process

There are very specific federal requirements that must be met when preparing a HMP. These requirements are commonly referred to as the Disaster Mitigation Act of 2000, or DMA2000 criteria. Information about the criteria may be found on the Internet at: http://www.fema.gov/mitigation-planning-laws-regulations-guidance.

The DMA2000 requires the plan to document the following topics:

- Planning process
- Community Involvement and HMP review
- Hazard identification
- Risk assessment
- Mitigation Goals
- Mitigation programs, actions, and projects
- A resolution from the community adopting the plan

The planning process kicked-off on December 2, 2014 by establishing a local planning committee and holding a public meeting. The planning committee examined the full spectrum of hazards listed in the State Hazard Mitigation Plan and identified five hazards the HMP would address.

After the first public meeting, City and Tribal staff and AECOM began identifying critical facilities, compiling the hazard profiles, assessing capabilities, and conducting the risk assessment for the identified hazards. Critical facilities are facilities that are critical to the recovery of a community in the event of a disaster. After collection of this information, AECOM helped to determine which critical facilities and estimated populations are vulnerable to the identified hazards in Golovin.

A mitigation strategy was the next component of the plan to be developed. Understanding the community’s local capabilities and using information gathered from the public
Mitigation goals are defined as general guidelines that explain what a community wants to achieve in terms of hazard and loss prevention. Goals are positively stated for future situations that are typically long-range, policy-oriented statements representing community-wide visions. Mitigation actions and projects are undertaken in order to achieve your stated objectives. In May, 2015, your HMP planning committee identified projects and/or actions for each hazard that focus on six categories: prevention, property protection, public education and awareness, natural resource protection, emergency services, and structural projects. A representative sample of the mitigation actions identified as a priority by the planning team are listed below, and explained in more detail in the plan.

The Planning Committee

The plan was developed with the assistance from the community’s planning committee consisting of a cross section from the community. Planning Team members who helped with developing the plan include Team Leader, Mayor Kathy Fagerstrom, with assistance from City Clerk Virginia Olana, the City and Tribal Councils, and AECOM.

Sample of the City of Golovin’s Mitigation Actions. Review the draft HMP for a complete list.

<table>
<thead>
<tr>
<th>New: Identify and pursue funding opportunities to implement mitigation actions.</th>
<th>New: Integrate the Mitigation Plan’s hazard vulnerability assessment findings for enhanced emergency planning.</th>
<th>New: Develop and implement programs to coordinate maintenance and mitigation activities to reduce risk to public infrastructure from severe winter storms (snow load, ice, and wind).</th>
</tr>
</thead>
<tbody>
<tr>
<td>New: The City will strive to manage their existing plans by coordinating and incorporating mitigation provisions with all community plan processes such as comprehensive, economic development, capital improvement, and land use, transportation plans etc. to demonstrate multi-benefit considerations and facilitate using multiple funding source consideration.</td>
<td>NOTE: The following projects or activities were brought forward from the legacy 2008 HMP:</td>
<td></td>
</tr>
<tr>
<td>1A: Hold an annual or biennial “hazard meeting” to provide information to residents about recognizing and mitigating all natural hazards that affect the City of Golovin.</td>
<td>3A, 6A, 7B, 9A, 11A: Support hazard mapping efforts of the City overlay with all critical facilities, infrastructure, and residential and non-residential buildings to facilitate locational siting. (High water flow flooding &amp; scour, ground failure (landslide, rockslide, permafrost, wildfire))</td>
<td></td>
</tr>
<tr>
<td>2A, 8A: Install a Community Siren System to alert the community of a natural hazard occurrence to enhance warning and response activities to increase warning time for the community.</td>
<td>3B: Join the NFIP, which regulates development in floodplains and provides federally backed insurance to individuals who live in communities that have joined the program.</td>
<td></td>
</tr>
<tr>
<td>1A, 10D: Develop, acquire, and/or purchase hazard brochures to educate community concerning HMP identified hazard’s impacts, monitoring, and mitigation (earthquake, flood, radon, ground failure, winter storms, wildfire)</td>
<td>3D: Install high water flow scour control measures such as gabion baskets, riprap, sheet-piling, and/or geotextile fabric where needed, taking into consideration potential ice override event effects.</td>
<td></td>
</tr>
<tr>
<td>5A, 6A, 7B, 9A, 11B: Adopt an ordinance that prohibits new structures within historic hazard areas (flood, ice run-up, permafrost, landslide, zone).</td>
<td>4B, 8B, 9A: Encourage use of natural hazard resistant construction materials and practices for new and remodeled structures to resist impacts (Earthquake, flood, permafrost, )</td>
<td></td>
</tr>
