## Preface

The plans covered in this document are ultimately designed to foster the State of Alaska's alignment with the National Preparedness Goal.

*"A secure and resilient nation with the capabilities required across the whole community to prevent, protect against, mitigate, respond to, and recover from the threats and hazards that pose the greatest risk."*

For the State to reach this goal, threats and hazards, specific to Alaska, must be identified, response capabilities must be understood, and the delta between the two addressed through planning, organizing, equipping, training and exercise. Under the Emergency Management Performance Grant (EMPG) Program, each year the Division of Homeland Security and Emergency Management (DHS&EM) will review this document during the annual Integrated Preparedness Planning Workshop (IPPW). Collectively with attending stakeholders from state, local and tribal organizations, make changes that allow the citizens of Alaska to schedule for developing or updating emergency plans, training events and exercises that evolve the State into a more secure and resilient place. This plan was not developed to be a rigid, non-flexible schedule of events. On the contrary, this multi-year forecast is moldable as time, situations and events change.

This document is designed to collect and prioritize the strategies of the emergency management stakeholders each year and move forward with a plan for the whole community to attain the aforementioned goal. In this multi-year plan, you will find the purpose of this document, the priorities decided upon and how the priorities will be addressed through plans, training and exercise in a three-year schedule.

## Purpose

The Integrated Preparedness Plan (IPP) documents the State of Alaska's overall planning, training and exercise program priorities for a specific three-year period. This is a living document to be updated and refined regularly. The program priorities are linked to corresponding core capabilities, and, if applicable, a rationale based on existing strategic guidance, threat assessments, corrective actions from previous exercises and real-world events, or other factors. This IPP identifies the emergency operations plans, developments or revisions, training events and exercises to help DHS&EM build and sustain the core capabilities needed to address the identified program priorities.

The IPP outlines a combination of progressively built exercises, along with the associated emergency operations plans and training requirements, which address the priorities identified in the IPPW. A progressive, multi-year exercise program enables State, Local and Tribal (SLT) jurisdictions to participate in a series of increasingly complex exercises, with each successive exercise building upon the previous one until mastery is achieved. Further, by including planning and training requirements in the process, SLT jurisdictions can address known shortfalls before exercising capabilities.

According to AS 26.20.025 and AS 26.23.040, this document aligns with the requirements to prepare and implement comprehensive plans and programs for homeland security and to establish and operate training programs. This document also aligns with Presidential Preparedness Directive 8 (PPD-8); state executive guidance, stakeholder emergency operation plans, training and exercise plans, and forecasts.

The IPP provides a graphic illustration of the proposed activities scheduled for the calendar years 2025 through 2027.

## Program Priorities (CY2025 - 2027)

### Priority 1: Enhancing Critical Transportation

Strengthen the capacity of the state supply chain to deliver assets from national-level sourcing through tactical-level employment while ensuring assets are accurately recorded and tracked.

#### Corresponding Core Capabilities:

Operational Coordination - Establish and maintain a unified and coordinated operational structure and process that appropriately integrates all critical stakeholders and supports the execution of Core Capabilities.

Logistics & Supply Chain Management - Deliver essential commodities, equipment, and services in support of impacted communities and survivors, to include emergency power and fuel support, as well as the coordination of access to community staples. Synchronize logistics capabilities and enable the restoration of impacted supply chains.

Supply Chain Integrity and Security - Strengthen the security and resilience of the supply chain.

### Priority 2: Improving Cybersecurity

Strengthen coordination on cybersecurity prevention, protection, response, mitigation, and recovery roles and responsibilities across all levels of government and the private sector – and between

cyber/information technology professionals and those in leadership, emergency management, continuity, operations, and other functions – to improve the cybersecurity capabilities of the whole community.

**Corresponding Core Capabilities:**

Operational Coordination - Establish and maintain a unified and coordinated operational structure and process that appropriately integrates all critical stakeholders and supports the execution of Core Capabilities.

Cybersecurity – Protect (and if needed, restore) electronic communications systems, information, and services from damage, unauthorized use, and exploitation.

Situational Assessment – Provide decision makers with decision-relevant information regarding the nature and extent of the hazard, any cascading effects, and the status of the response.

### Priority 3: Strengthening Partnerships

Examine the capabilities of the whole community to effectively implement locally executed, state-supported mass care services, including sheltering and feeding options within congregate and non-congregate sheltering, and transition impacted populations to temporary housing programs.

**Corresponding Core Capabilities:**

Economic Recovery - Return economic and business activities (including food and agriculture) to a healthy state and develop new business and employment opportunities that result in an economically viable community.

Housing - Implement housing solutions that effectively support the needs of the whole community and contribute to its sustainability and resilience.

Mass Care Services – Provide life-sustaining and human services to the affected population, to including hydration, feeding, sheltering, temporary housing, evacuee support, reunification, and distribution of emergency supplies.

## Additional Training Resources

### Training Providers

NTED draws upon a diverse group of training providers, also referred to as training partners, to develop and deliver NTED-approved training courses. These training providers include the National Domestic Preparedness Consortium (NDPC), the Rural Domestic Preparedness Consortium (RDPC), and the Naval Postgraduate School (NPS), among others.

### National Domestic Preparedness Consortium

The NDPC is a partnership of several nationally recognized organizations whose membership is based on the urgent need to address counter-terrorism preparedness needs of the nation's emergency first responders within the context of chemical, biological, radiological, and explosive WMD hazards. At present, the NDPC forms the core of the NTED training program. Its members are responsible for training the majority of responders who go through the NTED program. NDPC members include:

Center for Domestic Preparedness (CDP)

The Energetic Materials Research and Testing Center (EMRTC)

National Center for Biomedical Research and Training (NCBRT)

Texas A&M Engineering Extension Service (TEEX) National Emergency Response and Recovery Training Center (NERRTC)

National Nuclear Security Administration/CTOS-Center for Radiological/Nuclear Training (NNSA/CTOS)

National Disaster Preparedness Training Center (NDPTC)

Security and Emergency Response Training Center (SERTC)

## Other Training Consortia

The two following consortia websites contain training classes provided by multiple training providers who have developed or are developing training courses for NTED:

Rural Domestic Preparedness Consortium (RDPC)

National Cybersecurity Preparedness Consortium (NCPC)

## State Activities Forecast

### Calendar Year 2025

Training Location Legend: SC = Southcentral, SW = Southwest, FN = Far North, IN = Interior, SE = Southeast, VI = Virtual for AK

Jan 2025	Enhancing Critical Transportation/Building a Resilient Supply Chain	Improving Cybersecurity	Strengthen Partnerships/Mass Care	Implementing NIMS/NQS/Misc.
