Travel Advisory
For current driving conditions dial 511 or link to: http://511.alaska.gov/

Alaska Volcanoes
Bogoslof Volcano Alert Level: Watch and Aviation Color Code: Orange
Further eruptive activity was detected for several hours yesterday, but no ash was detected in satellite imagery. Recent satellite imagery shows that this eruption dramatically changed Bogoslof Island, and that a new, small island has formed just offshore of the northeast end of the main island. The former shore and much of the northeast side of Bogoslof Island adjacent to this island has been largely removed, and deposition of material has occurred on the west side of the island. The excavated area of the former northeast shore is likely the vent for this recent eruption, which appears to be just below sea level.

Cleveland Volcano Alert Level: Advisory and Aviation Color Code: Yellow
Pavlof Volcano Alert Level: Advisory and Aviation Color Code: Yellow
For Alaska Volcano updates, go to: https://wwwavo.alaska.edu/.

Alaska Cyber Security Advisories
The potential exists for malicious cyber activities, but no known exploits have been identified or known exploits have been identified but no significant impact has occurred. Advisories page is located at http://doa.alaska.gov/ets/security/S_Advisory/index.html.

For the State Cyber Security Program contact Chris Letterman, State Computer Security Officer: chris.letterman@Alaska.gov or go to the Alaska Department of Administration, Enterprise Technology Services at: http://doa.alaska.gov/ets/Security/.

The Next Situation Report: will be 27 December 2016 at 9:00 am. A significant change in the situation or the threat level will prompt an interim report.
