**Community Assistance and Monitored Events**

**Grayling Water Line Break**

The SEOC PIO was contacted by KTVA News yesterday afternoon about a possible disruption to the City of Grayling’s fresh water supply. The SEOC contacted the City’s Mayor who confirmed a broken underground water line had drained their community water tank. However, the water pump supplying the tank is producing enough flow to fill the water lines and supply the community. Local responders are excavating and repairing the ruptured line, but are hampered by frozen soils and extreme cold temperatures. The SEOC notified regional health organizations including Alaska Native Tribal Health Consortium (ANTHC), Yukon Kuskokwim Health Corporation (YKHC), and Tanana Chiefs Conference (TCC). TCC confirmed YKHC was also sending their remote maintenance worker and a representative from the Office of Environmental Health to assist local officials. An earlier report about the Grayling airport runway being unusable could not be confirmed by the FAA, DOT&PF or local air carriers. The SEOC will monitor this situation over the next few days.

**Significant Weather**

![Map of Alaska highlighting land and marine hazards.]
A winter weather advisory for the northern areas of southeast Alaska expires at noon today.

The wind chill advisory for the eastern Alaska Range and Denali National Park area has been extended until 10 am Thursday.
