THREAT LEVEL CHANGES: SEOC Level 1 – Routine Operations

NTAS BULLETIN: On January 4, 2020, Acting Secretary of Homeland Security Chad F. Wolf issued a new National Terrorism Advisory System (NTAS) Bulletin pertaining to the changing threat landscape following the successful U.S.-led airstrike in Iraq that eliminated Qaseem Soleimani, the head of the Iranian Revolutionary Guard Corps-Quds Force, a U.S.-designated Foreign Terrorist Organization.

To read the current bulletin, select the link above or view the PDF version here:

Significant Issues: Last week the Alaska Native Tribal Health Consortium (ANTHC) reported that three communities: St. Michael, Noatak, and Selawik, were all experiencing water or wastewater issues due to freeze-ups from the recent extreme cold temperatures. ANTHC Rural Utility Management Services is tracking all three issues, and advising the local utilities as necessary. There are no requests for assistance at this time. ANTHC has resolved the water issue in Noatak. The SEOC will closely monitor these restoration efforts over the next few days.

The SEOC continues to monitor the response and recovery efforts underway for the flooding along the Willow Creek in the Matanuska Susitna Borough (MSB).

Air Quality Index (AQI) Advisories
For the most up to date Air Quality Index Advisories:
The Matanuska-Susitna Borough has issued an air quality advisory for the Greater Butte Air Quality District through Wednesday, January 8. All open outdoor burning is prohibited until the advisory has expired.
An air quality stage one alert has been issued for the Fairbanks and North Pole areas in effect until 12:00pm Tuesday January 7th. All solid fuel-fired devices must cease operation unless there is a NOASH waiver. Residents should rely instead on their home’s cleaner source of heat (such as a gas or fuel oil fired furnace or boiler or electric baseboard heaters) until the Stage 1 alert is canceled.
