Significant Weather:

A Special Weather Statement has been issued for the northeast Gulf Coast region. A low-pressure system with heavy rain and high winds is expected to move through the area Friday night. Up to 2 inches of rain is expected over a 12 to 24hr period with winds from 30 to 45kts. Minor rises in creek and stream water levels are possible, but flooding is not expected.

A Special Weather Statement remains in effect for elevated surf levels along the Chukchi and Arctic Sea coasts from Shishmaref to Utqiagvik. Water levels one to two feet above the normal high tide line are expected.
A Special Weather Statement remains in effect for much of the interior. Snow accumulation of up to 4 inches is expected across the region at elevations above 2000 feet for the next two days.

A Special Weather Statement remains in effect for the Berg Glacier dammed lake east of Cordova. The lake is releasing water into the Gandil River. High water from this release usually lasts for several days and causes flooding between Bering and Starodubtsov Lakes. Debris is also expected in the Controller Bay area as a result of this release.

For more information and the most current weather, Watches / Warnings / Advisories go to: http://www.weather.gov/arh

**Fire Weather:**

For more information and the most current fire-related weather and warnings, go to: https://dnr.alaska.gov/burn or: https://fire.ak.blm.gov/predsvcs/weather.php

**2021 Fire Season**
The Alaska Interagency Coordination Center is at Preparedness Level 1. Wildland fire totals for 2021:
- Total Fires = 366
- Total Acres = 254,633

There are currently 28 active fires with 0 fires staffed.

Current fire information is at https://fire.ak.blm.gov or https://akfireinfo.com/

**The Next Situation Report:** will be 27 August 2021. A significant change in the situation or the threat level will prompt an interim report.
