Significant Weather:
Winter Storm Warnings and Winter Weather Advisories are currently in effect for most of the west coast from the Kuskowkwim Delta to Kotzebue for a large winter storm producing heavy snow, blowing snow, and low visibility.

Wind Advisories have been issued for Denali and the Eastern Alaska Range through midnight tonight. Winds 35 to 45 mph with gusts up to 65 mph are possible.

A Special Weather Statement has been issued for the Central and Eastern Beaufort Sea Coast for blowing snow with low visibility late Saturday night through Sunday night.

For more information and the most current weather, Watches / Warnings / Advisories go to: http://www.weather.gov/arh.

Avalanche Forecast:

There are areas near Valdez, Cordova, and Haines with moderate risk.

Check the Avalanche Forecast Center closest to your area for the most up to date information on avalanche potential. https://alaskasnow.org or https://www.weather.gov/afc/avalancheweather

The Next Situation Report: will be 07 March 2022. A significant change in the situation or the threat level will prompt an interim report.

This report is posted on the internet at https://ready.alaska.gov/sitrep. To register for email distribution, go to http://list.state.ak.us/mailman/listinfo/dhsem.situation.report. Direct questions regarding this report to the SEOC at 907-428-7100 or seoc@alaska.gov
