**(Significant changes from previous situation reports are red.)**

**Significant Issues:**

Both Individual and Public Assistance were authorized by the Governor verbally declared disaster for the Yukon Flats and Yukon-Koyukuk REAAs for river ice flooding in the communities of Chalkyitsik and Hughes. See attachment\*

**2026 Riverwatch Operations:**

**Kuskokwim Division:**

Breakup activity continues across the Kuskokwim River, with ongoing ice movement and fluctuating water levels. Significant downstream breakup progress has occurred near Bethel, Napaskiak, and Oscarville as channels and sloughs have opened. However, large stretches of intact ice remain farther downstream.

**Middle Yukon Division:**

Ice jams on both the Yukon and Koyukuk Rivers continue to cause flooding concerns. On the Yukon River, an ice jam about 20 miles downstream of Ruby caused water levels to rise upstream, resulting in minor flooding in the Big Eddy area Tuesday evening. Water levels in Ruby remained stable but ice movement reportedly stopped by Tuesday night.

River Watch crews will continue aerial assessments today between Koyukuk, Ruby, and Hughes.

## WATCHES:

Flood Watch for an ice jam in the Interior Kuskokwim Delta remains in effect through Thursday morning.

Flood Watch for snowmelt in the Yukon Flats remains in effect through Thursday evening.

Flood Watch for an ice jam in the Middle Yukon Valley remains in effect through Thursday evening.

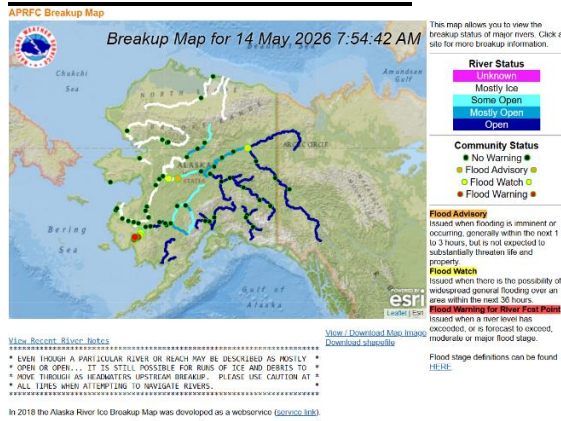

## ADVISORIES:

Flood Advisory for an ice jam near Tuluksak remains in effect until 4 PM AKDT Thursday.

Flood Advisory for an ice jam in the Middle Yukon Valley and Central Interior remains in effect until 10 PM AKDT Thursday.
