(Significant changes from previous situation reports are red.)

Significant Issues:

Hydaburg – On July 30, 2026, the City of Hydaburg declared a local disaster for ongoing water supply issues that left their community without running water. A multi-agency response is ongoing to support the community including nearby communities on Prince of Wales Island, Tlingit & Haida Tribes, Alaska Native Tribal Health Consortium, and Alaska Department of Environmental Conservation. Multiple shipments of bottled water have been donated or purchased. As of last report, the City had established an interim “grey water” supply for sanitation, showers were provided at two facilities, and work was ongoing to restore regular water supply. SEOC continues to be in regular contact with the community and responding partners. SEOC also contacted the Mass Care Group partners, should additional donations or volunteer services be needed.

Girdwood Power Outage – On Friday July 31 Girdwood Emergency Services contacted SEOC regarding a sustained power outage in the community. SEOC offered emergency generator deployment, but local resources were sufficient at the time. Power was restored later that evening.
