Significant Issues: Typhoon Halong: West Coast Storm *See Attachment

Mail pick-up services will continue at the Egan Center through the end of November. Bethel DAC has been extended through Friday, November 21. SEOC team members are providing ongoing support at the EOC, and Joint Field Office (JFO).

Emerging Incidents: Bering Sea Storm Forecast

State and federal teams continue to monitor conditions closely as storm systems move through the region into mid-week. Noting that while the overall risk of major coastal inundation appears reduced compared to earlier projections, elevated water levels remain possible in portions of Southwest Alaska. Favorable low-tide timing and current wind direction may help limit impacts; however, the active storm pattern is still expected to bring strong winds, snow, and mixed precipitation that may interrupt operations.
