(Significant changes from previous situation reports are red.)

Significant Issues:

Southeast High Tides:

National Weather Service advised with the Highest Astronomical Tides (HAT) also known as King Tides, occurring this week, there is concern for some minor coastal flooding in Southest. Highest concern is for Ketchikan, Port Alexander, and Sitka on Thursday as a stronger low moves near the southern panhandle.
Coastal flooding is uncommon in Southeast Alaska.

Kuskokwim Delta Elevated Water Levels:

National Weather Service advised elevated water levels are expected along the Kuskokwim Delta coast, specifically for Kipnuk and Kwigillingok late this week. Levels are expected to be similar to the most recent storm series that produced nuisance flooding but no substantial damage.
